### FCC COMPLIANCE STATEMENT FOR AMERICAN USERS

This equipment has been tested and found to comply with the limits for a CLASS A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at own expense.

### TO WHICH THIS DECLARATION RELATES IS IN CONFORMITY WITH THE FOLLOWING STANDARDS

European Standard EN55032:2012/AC:2013 , EN55024:2010. CFR 47, Part 15B

#### WARNING

This is a Class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

USER MANUAL

# SAFETY INSTRUCTIONS

Please read the following instructions carefully.

- 1. Keep the equipment away from humidity.
- 2. Before you connect the equipment to the power outlet, please check the voltage of the power source.
- 3. Make sure the printer is off before plugging the power connector into the power jack.
- 4. It is recommended that you connect the printer to a surge protector to prevent possible transient overvoltage damage.
- 5. Be careful not to get liquid on the equipment to avoid electrical shock.
- 6. For safety and warranty reasons, ONLY qualified service personnel should open the equipment.
- 7. Do not repair or adjust energized equipment under any circumstances.

### Caution

- \* Danger of explosion if battery is incorrectly replaced. Replace only with the equivalent type recommended by the manufacturer.
- \*\* Dispose of used batteries according to the manufacturer's instructions.
- \*\*\* Only use with designated power supply adapter model.
- \*\*\*\* Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

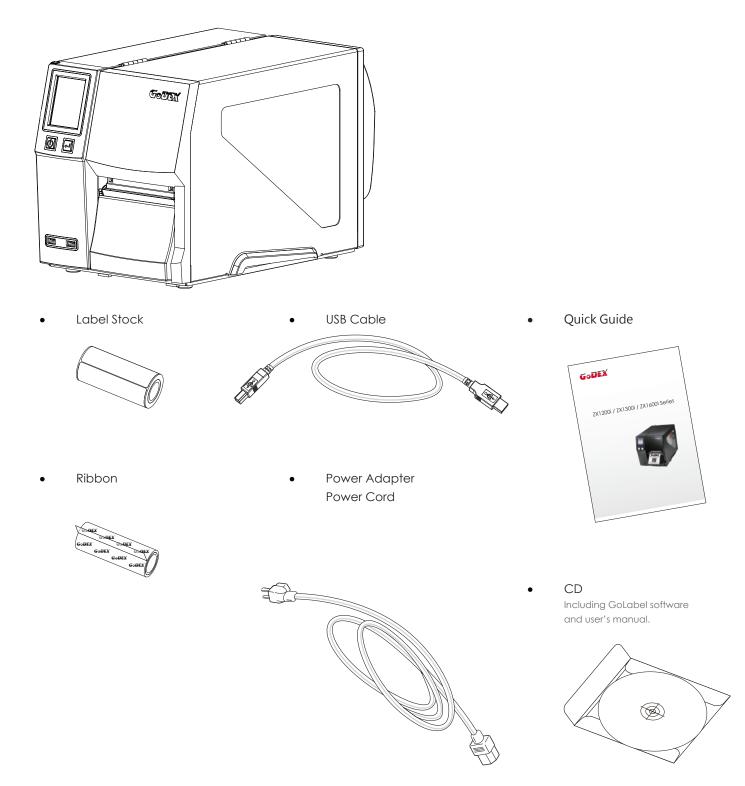

Specifications are subject to change without notice.

Barcode Printer

### 1.1 Box Content

Please check that all of the following items are included with your printer.

• ZX1200i / ZX1300i / ZX1600i Barcode Printer

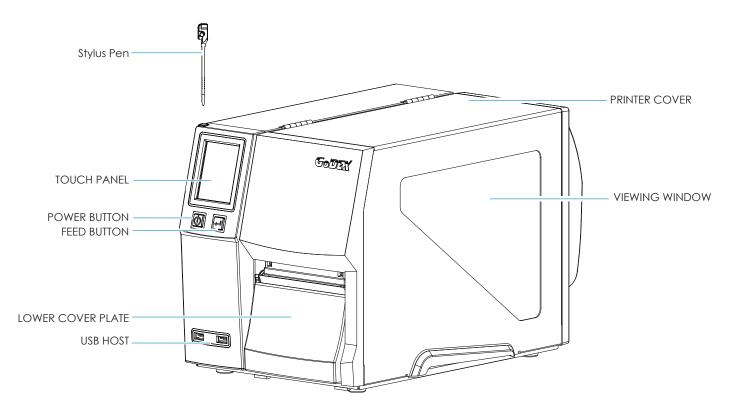

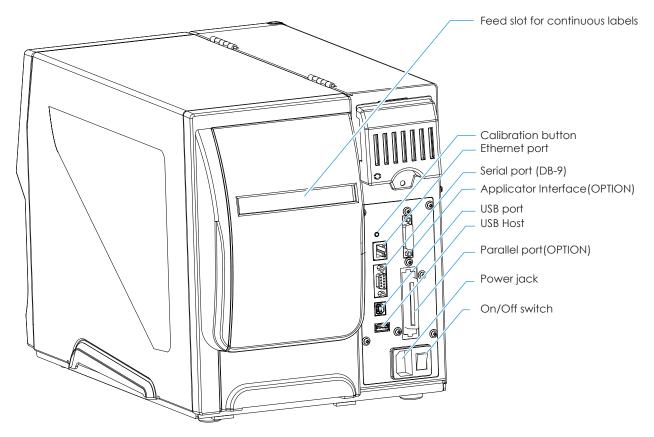

### 1.2 Getting to Know Your Printer

### **Device Overview**

• Front View

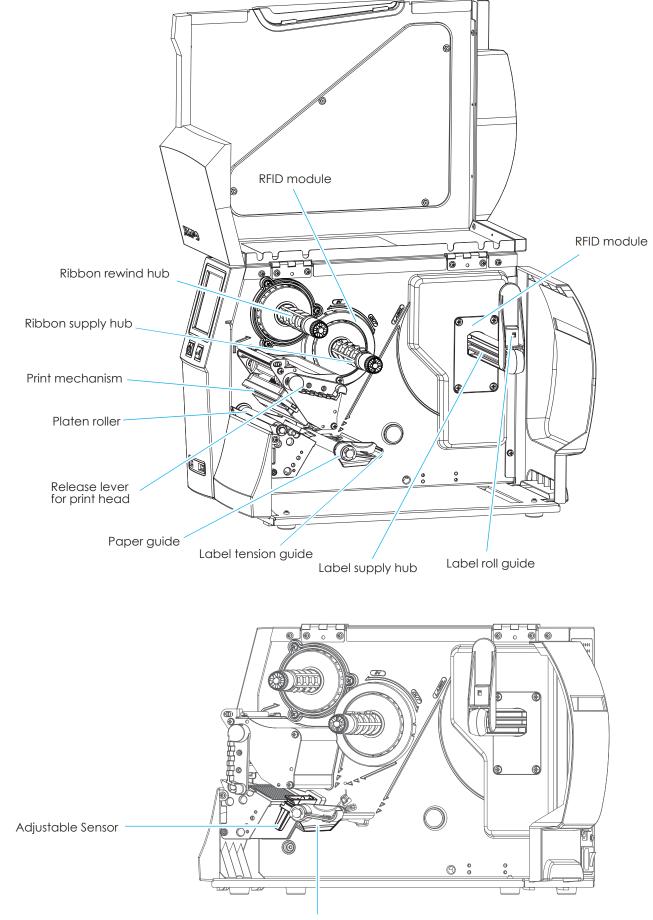

Rear View

#### The Internal View of Printer

Paper guide

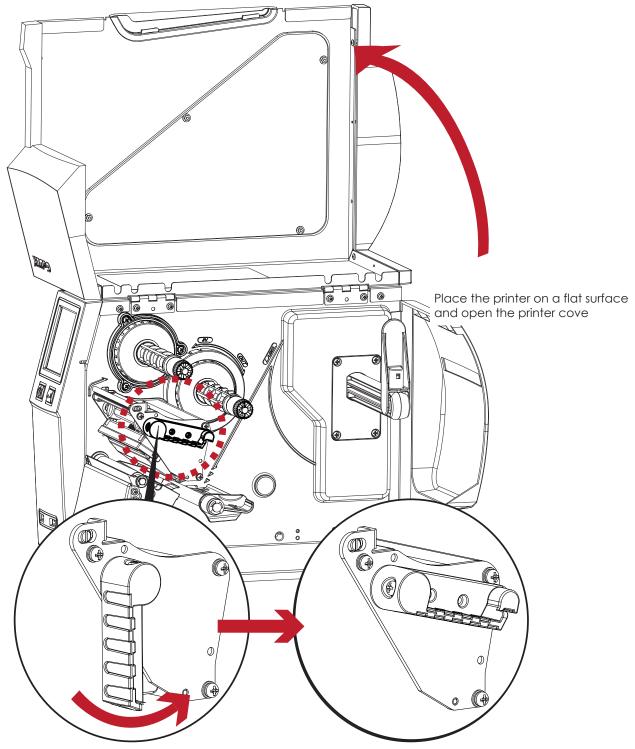

# 2 Printer Setup

# 2.1 Loading the label roll

This printer supports the following printing methods:

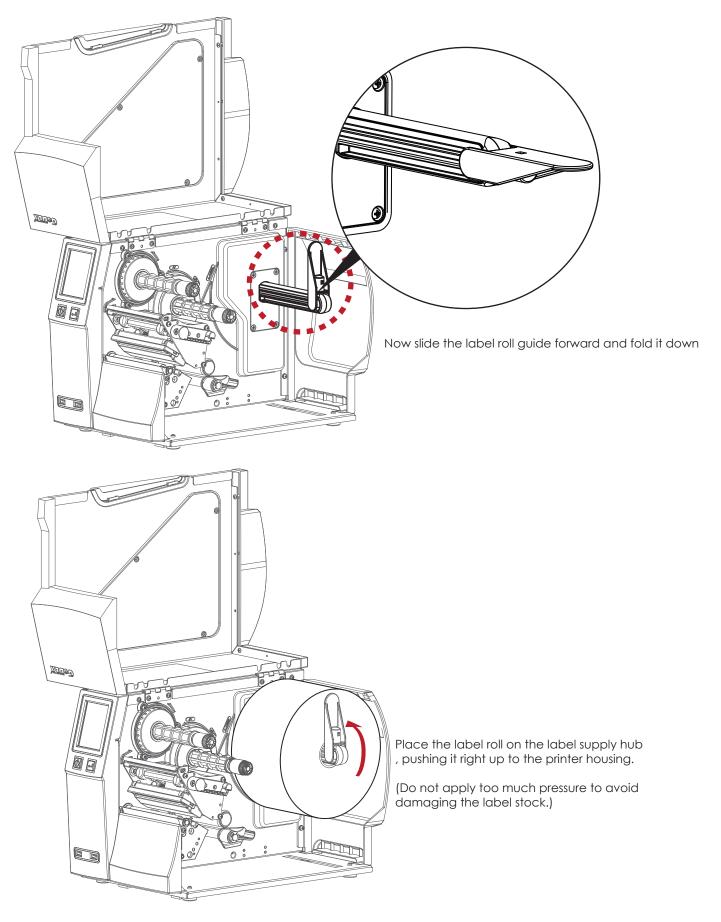

Thermal transfer printing (TTP) : Requires a ribbon for transferring a printed image to a medium. Direct thermal printing (DTP) : Does not require a ribbon, only thermal paper.

Please check which printing method you are using and alter the settings accordingly in the printer driver, printer menu, and/or software.

Turn it anticlockwise to a top right position as shown in the illustration

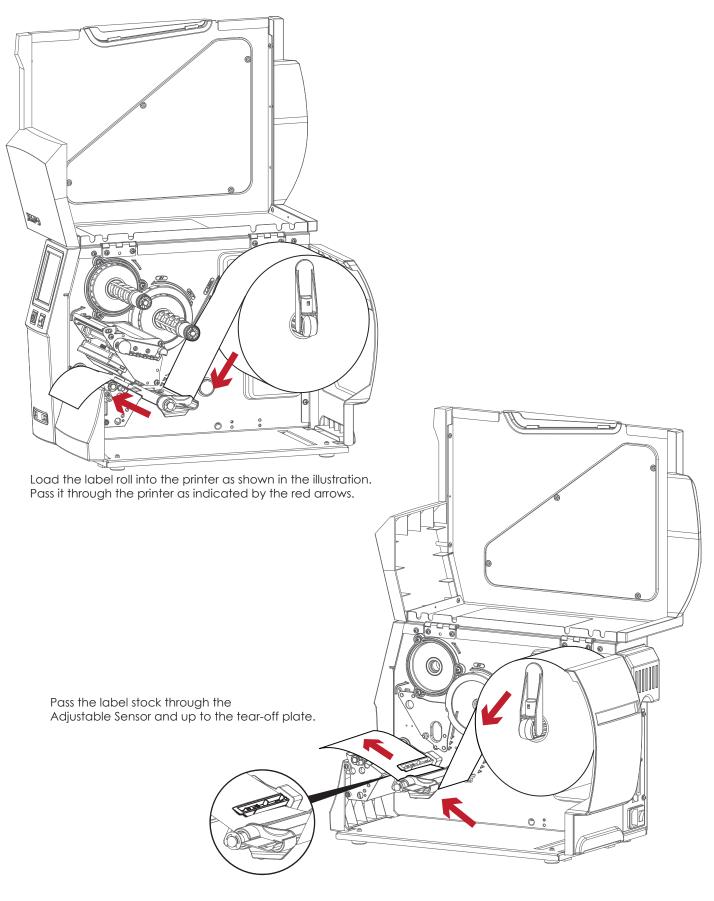

### Note

<sup>\*</sup> When moving the label roll guide, hold it only by the end that is attached to the bracket, not by its top.

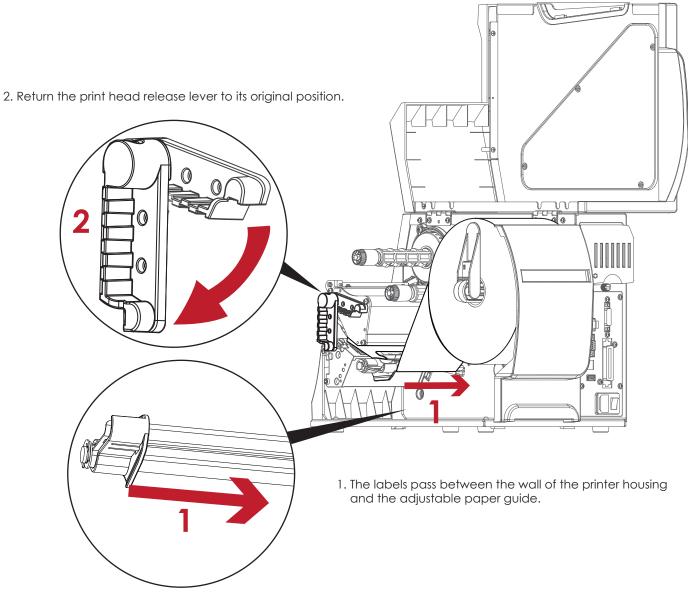

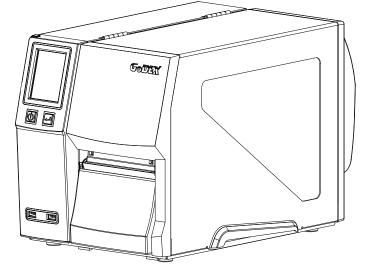

### Note

<sup>\*</sup> Remember to set the movable sensor to gap, black mark, or tag hole by changing the position of the sensor with the adjustment wheel.

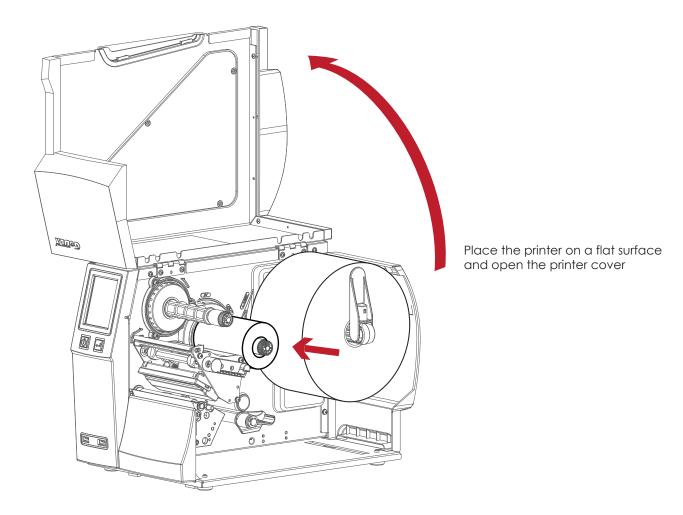

Then close the printer cover.

# 2.2 Loading & Removing the Ribbon

# Loading Ribbon

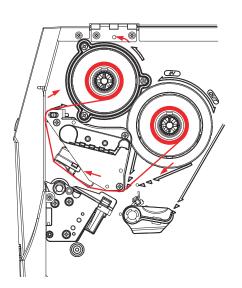

Place a new ribbon on the ribbon supply hub.

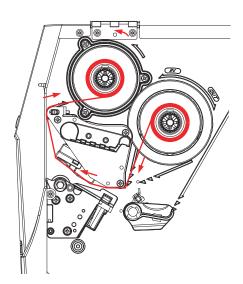

The two illustrations as below show you how to install the ribbon depending on the ribbon type (ink side in or out).

8

Ink side out

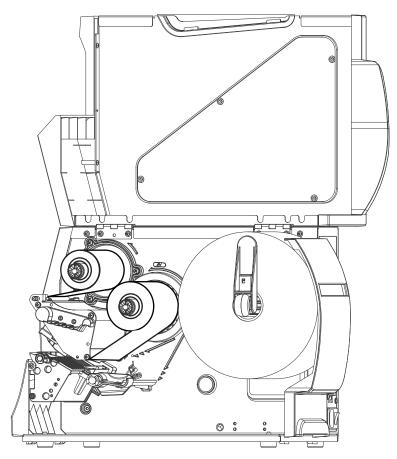

Pass the ribbon under the print head and back up on the other side. Attach it to the empty ribbon core.

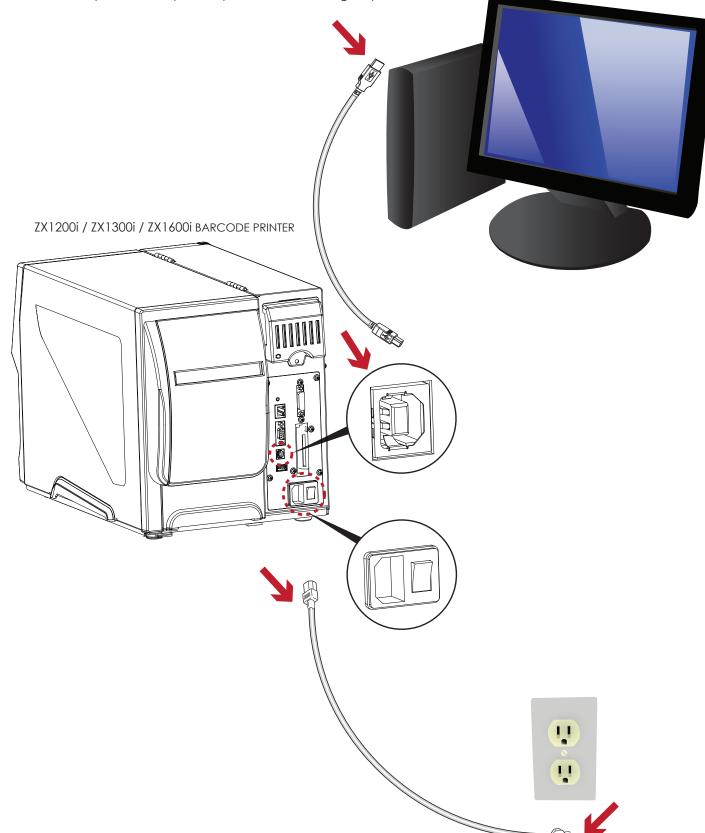

### Note

 $<sup>^{\</sup>ast}$  Do not pass the ribbon under the sensor.

# 2.3 Connecting the Printer to the Host Computer

- 1. Please make sure that the printer is switched off.
- 2. Connect the power cord to the AC adapter and connect the adapter to the printer.
- 3. Connect the USB cable to the printer and host computer.
- 4. Switch on the printer. The operator panel should now light up.

# 2 Printer Setup

# 2.4 Installing Printer Driver and GoLabel with Super Wizard CD

1. Insert the Super Wizard CD in the CD/DVD drive of the host computer and the program should pop up automatically.

You will see the Welcome screen first. On the Welcome screen, choose "Standard Installation".

GODEX V1.01	Findlish •
Welcome to GoDEX a high quality GoDE	and thank you for choosing X Printer.
STANDARD INSTALLATION	Select "Standard installation" to install the Galabel design software and the Seaguil Windows driver for your GaDEX printer. (For USB cable connection ONLY)
OTHER CHOICES	Select "OTHER CHOICES" for custom installation, documentation, accessories, technical support, label design software, Ethernet and now to buy,
Exil	

2. The wizard will then ask you to make sure your USB and power cables are connected and that the power is turned on. Make sure that is done and then click "Next".

Exit	< BACK NEXT >

3. The next screen you will see to choose ''Download the latest version from GoDEX server'' or ''Install from this product disc.

# 2 Printer Setup

4. As the printer driver and GoLabel are installing, a screen will display a progress bar.

5. Once the installation is complete, you can start to make and print labels with GoLabel or through the printer driver.

GoDEX	STANDARD INSTALLATION
GoLabel Later Bergin Schware	START GOLABEL DESIGN SOFTWARE NOW
G	EXIT TO MY DESKTOP
	< \$ACK Home

6. As the optional steps, you can also print a test label or register your printer during the "Standard Installation" procedure.

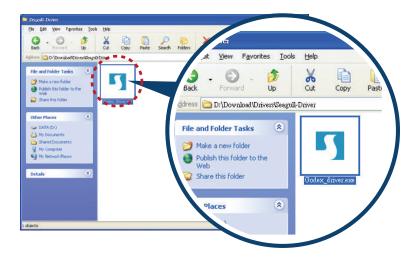

### Note

\* If you need more resources, tools or reference documents, you can also find them on Super Wizard CD. Just click "Other Choices" on Welcome Screen to access the files.

### Installing Printer Driver Directly from CD Folder

1. Insert the product CD in the CD/DVD drive of the host computer and open the "Seagull Drivers" folder on the CD. Select the icon for the driver file and click it to start the installation.

2. Follow the instructions on the screen. The Driver Wizard guides you through the installation procedure. Select "Install printer drivers".

# 2 Printer Setup

7. Once the driver installation is complete, the new printer should appear in the "Printers and Faxes" folder.

# 3.1 Operation Panel

### **POWER Button**

Press the POWER button to turn on the printer, and the START UP SCREEN appears. The printer is on "ready to print" status, the LCD screen should display the message "READY" on the screen.

### When printer is turned on, hold and press down the POWER button for 3 second will turn the printer off.

### FEED Button

Turn on the printer and press the FEED button.

When you press the FEED button, the printer will advance media until the FEED button is released. If you are using continuous labels, pressing the FEED button will advance a length of media until the button is released. If you are using media with gaps, pressing the FEED button once will advance only one label.

If the label does not stop at the correct position, you need to run the auto-detection function for your media, please see Section 3.4 Label Calibration and Self-Test.

### PAUSE PRINTING\_FEED Button

Pressing the FEED button while the printer is in standby mode will set the printer to pause mode. In this mode, the printer can receive commands, but it will only process them when it is reset to standby mode. Pressing the FEED button again will reset the printer to standby mode.

Pressing the FEED button during printing will interrupt printing. When the FEED button is pressed again, the printer resumes printing. Example: While a 10-label print job is running, you press the FEED button to pause the printer. Two of the labels have been printed. To resume printing and print the remaining eight labels, you will need to press the FEED button again.

### CANCEL PRINTING\_FEED Button

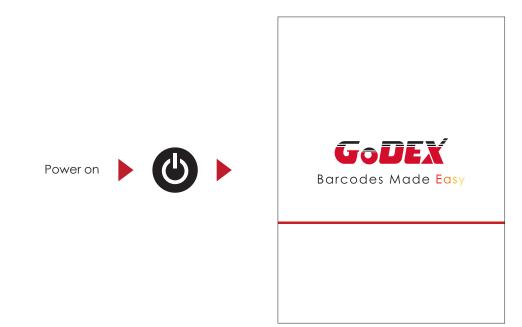

Press and hold the FEED button for 3 seconds during printing cancels a print job. The current print job is cancelled. Example: While a 10-label print job is running, you press the FEED button. Two of the labels have been printed. The print job is cancelled and the remaining eight labels will not be printed.

# **3** Printer Setting and Control

# 3.2 LCD Interface Introduction

### **Getting Started**

Press the POWER button to turn on the printer, and the START UP SCREEN appears.

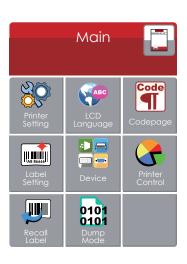

If the printer is on "ready to print" status, the LCD screen should display the message "Ready" on the screen. Use touch gestures to get around the Home screen and other screen for setting.

Tap the screen with your finger or the stylus pen when you want to select on screen items such as settings icons. On the Ready Page, three function mode for setting. You can make various setting functions in FUNCTIONAL MODE.

### Status of LCD Interface

When printer is on standby status (ready to print), the LCD interface will display "Ready" on screen. You can only print when you see the "Ready" status.

Unlock

If there is any printers error, the LCD screen will display the error screen to show the type of error. You can fix the error according the notice.

Touch display icons again to unlock the value.

# 3 Printer Setting and Control

#### Label Calibration and Self Test 3.4

### Label Calibration

The printer can automatically detect and store label height. That means the host computer does not need to transmit the label height to the printer.

### Self Test

Self-test function lets you check whether the printer is functioning normally. Here is how you run the label size calibration and self test.

- 1. Check that the label stock is loaded correctly.
- 2. Turn off the printer.

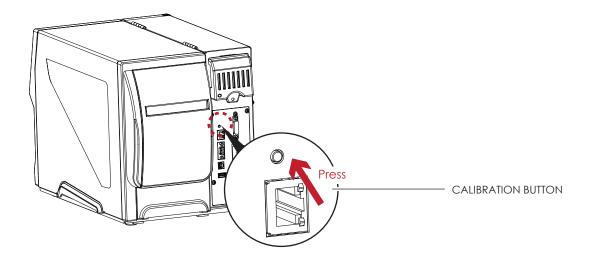

- 3. Turn the printer on again, keeping the FEED button pressed. When the LED starts to flash red, release the FEED button. The printer will now measure the label stock and store the label height.
- 4. Once the printer has successfully measured the label stock, it will print a self-test label.

The contents of a self-test printout are listed below.

### Label Calibration Button

A hardware button to make a Label Calibration while printer encountering ''Media Error'' during the cases when first-time printer start up or change label or ribbon to another type, such as change using gap label to continuous or black mark labels.

Press C-button for 2 seconds, it will make an auto-sensing to calibrate the label and ribbon's parameters.

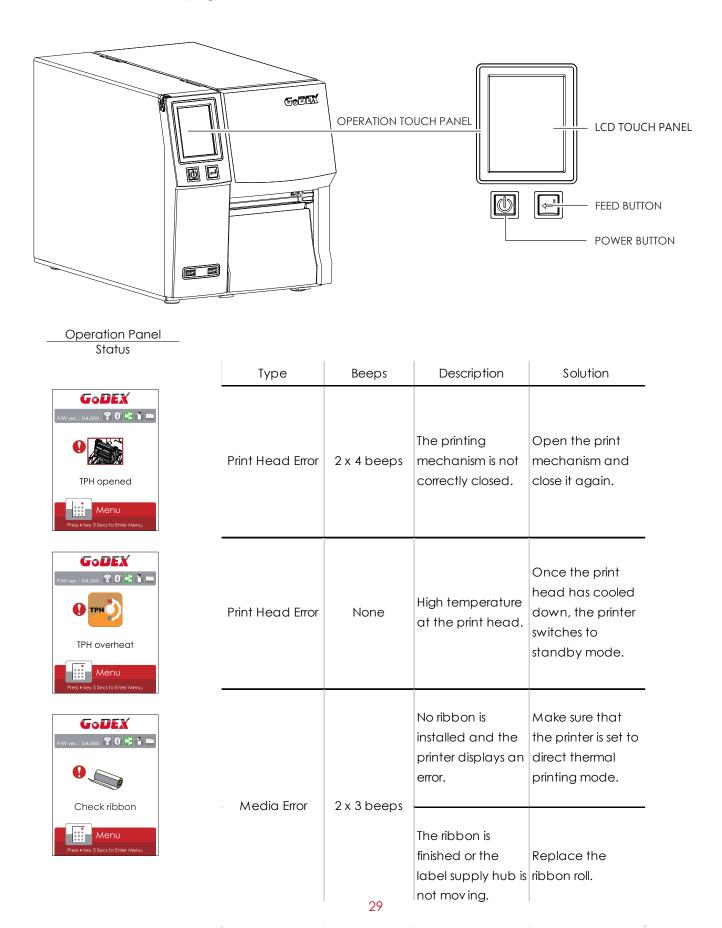

### Note

<sup>\*</sup> Press C-button is equivalent to the auto-sensing command ''~S,SENSOR'' that will cancel on-printing-job and make the Label Calibration immediately.

# **3** Printer Setting and Control

# 3.5 Error Alerts

In the event of a problem that prevents normal functioning of the printer, you will see an error message on LCD screen and hear some beep signals. Please refer to below table for the error alerts.

Solution   Solut	Make sure that the label sensor is positioned correctly. If the sensor still does not detect the paper, run the auto- detection function again. Replace the label roll. Possible reasons: the print medium has become trapped around the rubber roll; the sensor cannot detect a gap or

File name can't be found       File Error       2 x 2 beeps       Unable to find file.       all The printer prints       ch the message "File         Image: Menu Press Key 3 Secs to Enformance       Name not found"       wh not	Use the "~X4" command to print all files. Then check whether the files exist and whether the names are correct.
Goldex       A file of the same name already exists. The printer prints the message       Change of the same name already exists. The printer prints the message	Change the name of the file and try storing it again.

# **3** Printer Setting and Control

# 3.6 USB Host

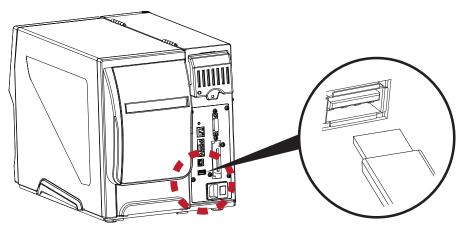

Definition : USB Host port supports either device : USB memory stick, keyboard or scanner.

### Purpose

- USB memory stick : It extends the user memory space up to 32GB for Graphic, Font, Label Format, DBF and Command files downloading. The printer's Firmware also can be updating if copy new version of Firmware into USB memory stick.
- Connecting an USB keyboard to printer for ''Keyboard Mode'' mode operation.
- Plug-in an USB scanner to operate the printer in ''Keyboard Mode''.

### Usage of Extended Memory

- USB memory stick : It supports hot-plugging function; printer will create a Folder ''\LABELDIR'' and switch ''User Flash'' to '' Extended Memory'' automatically while user plugs an USB memory stick into a GoDEX printer.
- Connect the USB Stick plugged -in printer to PC via USB Device or Ethernet port and run ''GoLabel'' software to download Graphic, Font, Label Format, DBF and Command files to the printer.
- Detail download procedures, please refer to ''GoLabel On-line Help''.

### Usage of Firmware Update

• Remove USB memory stick from printer and plug-in it to a PC's USB port; delete Firmware ''\*.bin'' file from

"\LABELDIR\FW" of USB memory stick if it existing; or create a Folder "\LABELDIR\FW" to USB memory stick if it doesn't existing.

- Copy a new version of Firmware ''xxxx.bin'' to the Folder ''\LABELDIR\FW''; and then remove USB and plug-in back to the printer that going to update Firmware.
- The printer will update the Firmware automatically when plug-it-into the printer and printer find-out the Firmware in ''\LABELDIR\FW'' is newer version.
- Don't remove the USB memory stick out while it's under updating with ''Flash Writing...''message that displays on LCD panel.

#### USB Keyboard

- When plug-in an USB keyboard to the printer, LCD touch panel will display "Enter Standalone", press the "Y" key on keyboard to entering to the dialog for "Keyboard Mode" operation.
- Here have six sub-dialogs "Recall Label" "Country Code" "Code Page" "Clock Setting" "Database Setting"
  "Label Edit" is able operating by keyboard as follow definition:
  - 1. Press "ESC" key to exist from "Keyboard Mode" or back to previous dialog
  - 2. Press "F1", it will let the printer from "Home Page" mode entering into "Keyboard Mode"
  - 3. Press "Enter", "Arrow" and "Alphabetic" keys as the usual in PC that will perform the key-in function of "Keyboard Mode".

#### Scanner

- When plug-in an USB scanner to the printer, LCD touch panel will display "Enter Standalone", tap the "Y" to entering the dialog of "Keyboard Mode" operation.
- Scanner is using in "Keyboard Mode" to scanning the "Serial Number, Variable" and Print Quantity while the printer prompts a message on LCD touch panel and wait for data input.

### Note

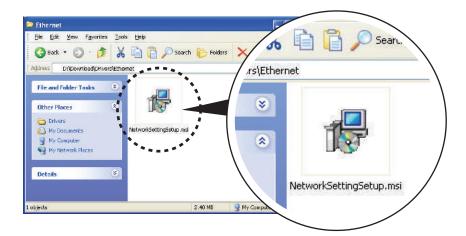

- \* The USB Host port on GoDEX printer is without ''HUB'' function.
- \* The USB Memory Stick supports with ''FAT32''Disk Format and up to 32GB only. The certified venders are Transcend, Apacer, Patriot, Consair and Kingston.
- \* The download function for Graphic, Font, Label Format, DBF and Command files is operated by GoLabel of PC and must go through the a ''i'' ''x'' model printer itself.
- \* On a PC, user may copy entire folder''\LABELDIR'' from USB memory stick to PC or vice-versa. Copy a sub-folder or individual file in ''\LABELDIR'' to PC or vice-versa is not supported.

### 4.1 Installing the NetSetting software

The NetSetting software is used to manage the network configurations when connecting the printer via Ethernet port. It is available on product CD or can be downloaded from official website. To install the NetSetting, please follow below steps.

- 1. Insert the product CD in the CD/DVD drive of the host computer and open the "Ethernet" folder on the CD.
- 2. Select the icon for the NetSetting installation file and click it to start the installation.

- 3. Follow the instructions on the screen. The Setup Wizard guides you through the installation procedure.
- 4. Specify the "Installation Folder".

🛃 NetSetting	
Select Installation Folder	NetSetting
The installer will install NetSetting to the following folder. To install in this folder, click "Next", To install to a different folde Folder:	r, enter it below or click "Browse".

Subnet Mask:	255.255.255.0 I	
Set	Refresh	

You can press "Set" button to apply the settings and "ReGet" button to refresh the setting values.

### Notice

- \* To fully benefit from the NetSetting software, you should be familiar with basic networking principles. Please contact your network administrator for related network setting information.
- \* When enabling DHCP, if you find the IP Address as: IP = 169.254.229.88, Netmask = 255.255.0.0, Gateway = invariable (last value), the IP Address is invalid.

#### **Alert Path Setting**

NetSetting will send the alert messages to designated mail account when the error happened on printer. The alert messages are sent by SMTP (Simple Mail Transfer Protocol) or SNMP (Simple Network Management Protocol). You can set or change the configurations of SMTP and SNMP on this "Alert Path Setting" tab.

	<b>8</b>		5

You can press "Set" button to apply the settings and "ReGet" button to refresh the setting values.

4 NetSetting for Ethernet

#### **Printer Configuration**

Set or change the configurations of connected printer. Most of key settings for the printer operation can be done by this setting page.

	b 🧕 '	Printer Confi	-	5			
Printer Setup							
Printer Model	Tear-off Pos	ition	5	Speed		Darkness	
ZX1200i	12	*	2		*	12	۲
	Dispenser/App	licator	Labe	els per C	ut	Printing Mod	le
	0 (None)	- (	0			Thermal Transfer	*
4800 Parity		al Chinese		•	0 - Refle		
1.53.65.65	Traditon:	al Chinese			0 - Refle	ctive	•

Data Bits		Code Pa	<b>a</b> 0			Top Of Form	
8	Code Pa		ge		ON	100 011 0111	
Stop Bits		Buzzer					
1	• ON	Duzzei		•			

You can press "Set" button to apply the settings and "ReGet" button to refresh the setting values.

#### **User Command**

The "User Command" tab provides a communication interface for operator to control the printer. Input printer commands in "Input Command" window and press "Send Command" button, the commands will be sent to the printer.

For some commands that will return response message, the message will be displayed in "Output Message" window.

GoDEX	NetSetting Terminal		■ ⊠
Image: A state of the state	👱 😵 🔛	9	
Input Comman	d	Send Command	
Output Maccas			
Output Messag	je	Clear Data	

You can press "Send Command" button to send printer commands via Ethernet port and control the printer remotely.

#### Firmware Download

On "Firmware Download" tab, the current version of printer firmware will be showed on the screen. If you need to update the printer firmware, just specify the file location of firmware file and press "Start Download Firmware" button. The printer firmware then can be updated remotely.

Gol	EX	NetSetting Firmware Upgrade	
	IR 💩 🔐	*	
		Firmware Upgrade	
	Firmware Current Version: Please Select Firmware File:		Browse
		Start Download Firmware	
	Recover To Factory Settings		

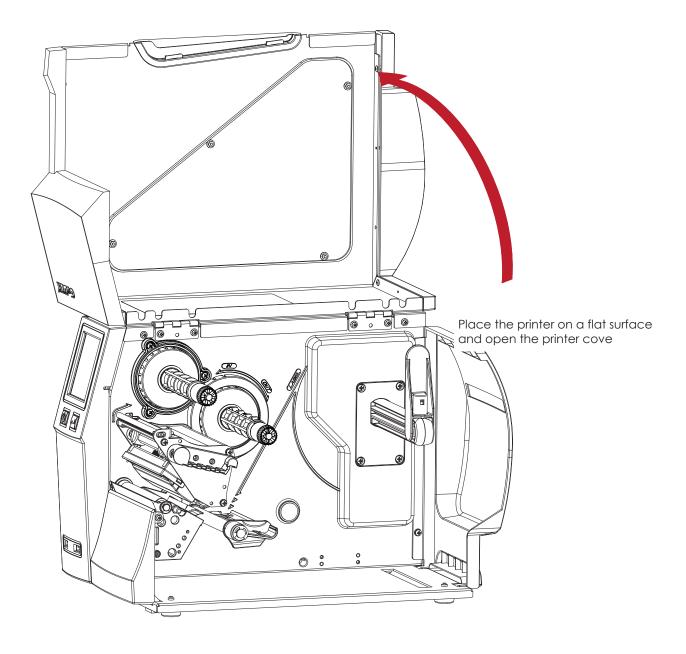

In addition to the firmware update, you can press "Recover To Factory Settings" button to restore the printer configurations back to factory default.

### 5.1 Preparation Steps

Before installing the optional modules, please make some preparations as follows.

- 1. Turn off the printer :
- Remember to switch off the printer before installing any module.
- 2. Open the printer cover

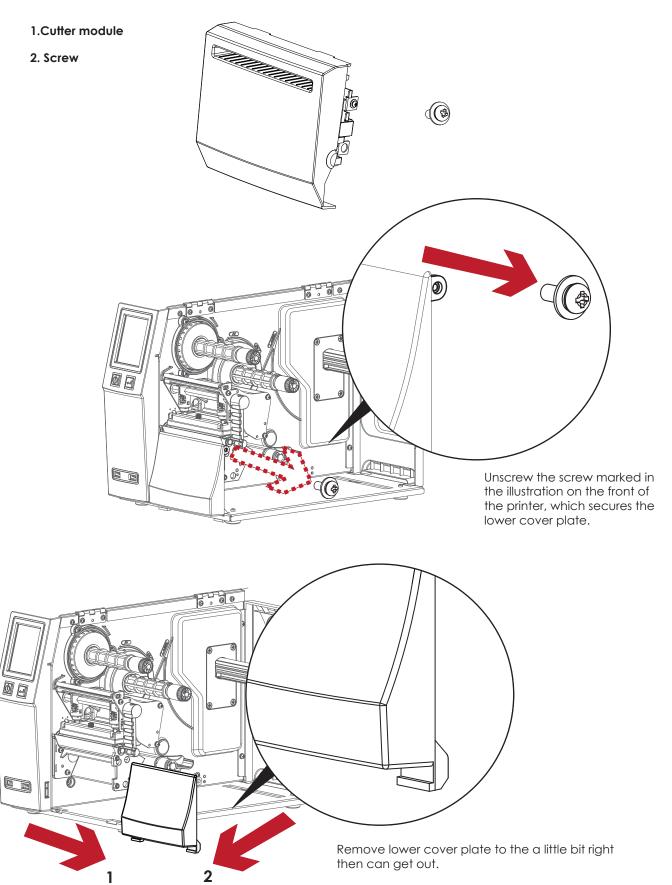

### Notice

- \* Remember to switch off the printer before installing the cutter.
- \*\* Do not use to cut adhesive labels! Glue residue will be left on the cutter blade and impair its functioning.
- \*\*\* Under the ordinary paper application condition, the cutter performs 300000 cuts of a heavy paper with up to 250 μm thick or 100000 cuts of a plastic sheet with up to 300 μm thick.

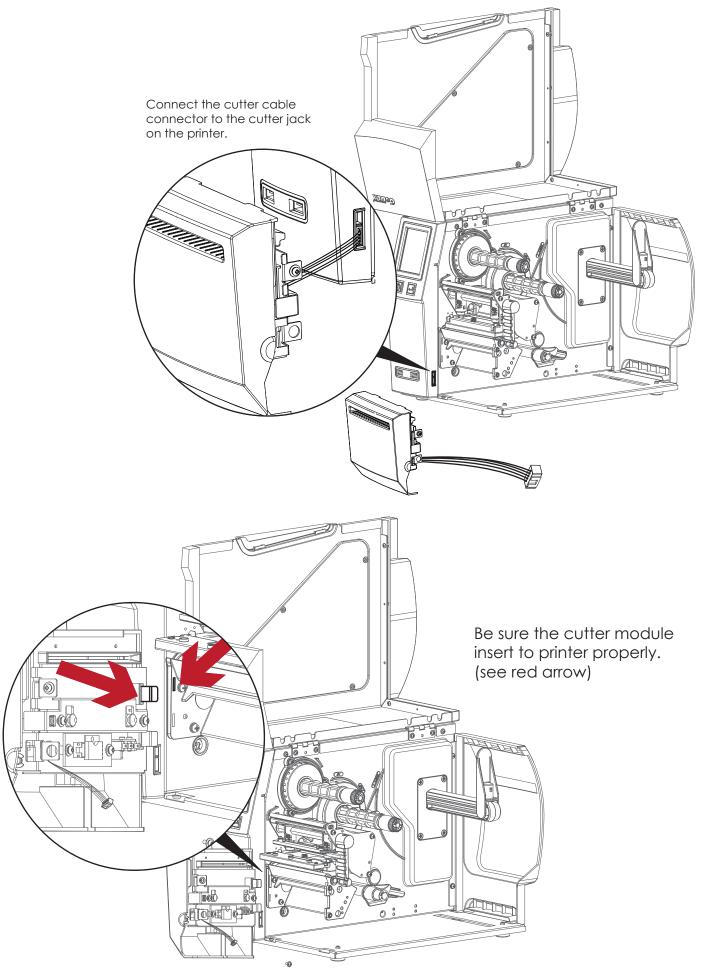

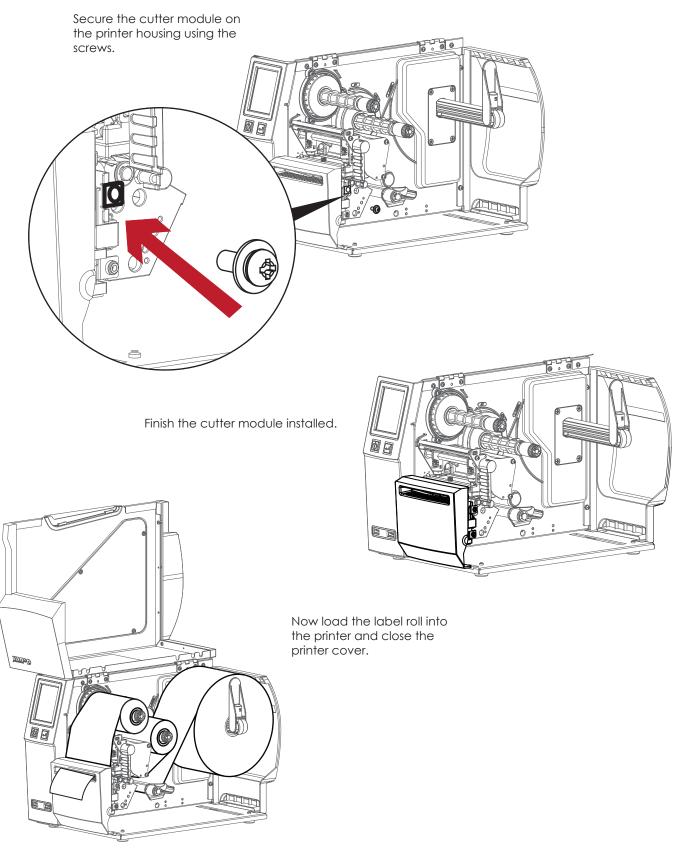

### 5.2 Installing the Cutter

#### The Overview of the Cutter

# 5 Accessories

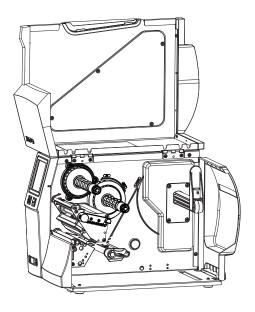

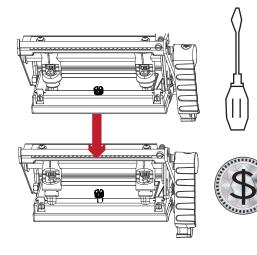

### Notice

- \* Check whether the cutter function is enabled in the printer.
- \*\* Labels or paper should be at least 30 mm high.
- \*\*\* After installation of the cutter module, set the stop position (^E) to 30.

# 6.1 Installing / removing the print head module

Open the printer cover.

۲

using a screwdriver or a coin, loosen the screw to take out the TPH module.

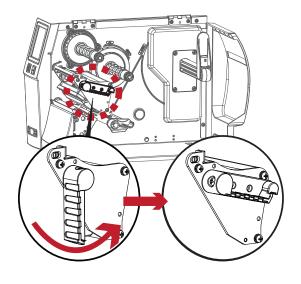

Turn the print head counterclockwise to a top right position

Hold the print head module , pull out the TPH cable smoothly. To install TPH module, follow the reverse order.

Note
\* Remember to switch off the printer before removing the print head module.

۲

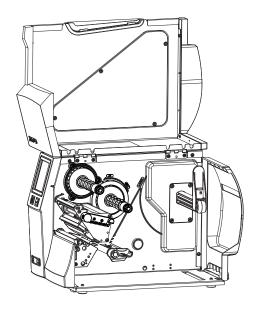

64

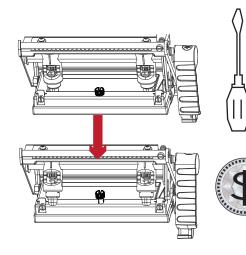

### 6.2 Adjusting the print line

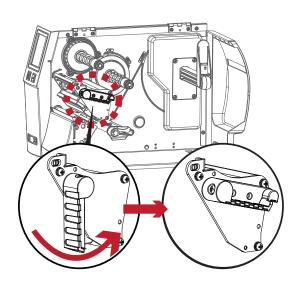

Open the printer cover.

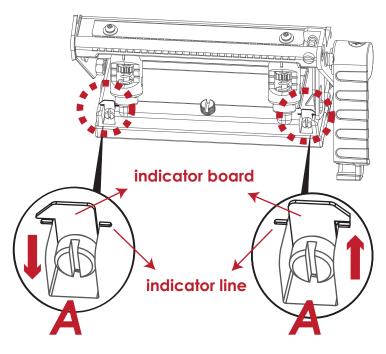

using a screwdriver or a coin to loosen the screw

Turn the print head counterclockwise to a top right position

If no improvement is visible, turn the screws(A) clockwise or counterclockwise as far as possible and be sure to align with the indicator board and indicator line. Repeat the adjustment process until printing quality has improved.

## 6.3 Adjusting ribbon tension

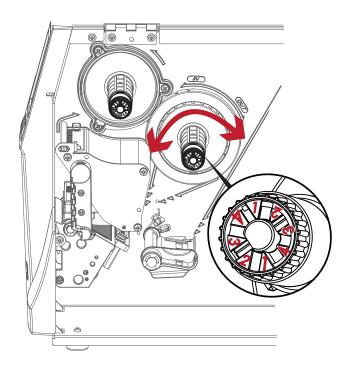

You can adjust the ribbon tension by turning the ribbon shaft knob (see illustration) clockwise or counterclockwise. There are 4 possible settings, which is marked on the ribbon supply hub.

- # 1 : Tension is the highest
- # 4 : Tension is the lowest

If the tension is so low that the ribbon does not move forward, you need to reduce the tension of the ribbon supply hub. To set the tension, press in the knob and turn it clockwise or counterclockwise as required.

Increasing the tension of the ribbon rewind hub will remove any wrinkling of the ribbon during printing, which results from the use of different ribbon materials. (For details about the wrinkling/creasing of ribbons, see Section 6-6.)

If you are using a very narrow ribbon, the printer may not move the label stock forward (particularly with a ribbon that is less than 2" wide). In that case, reduce the tension by turning the knob of the ribbon supply hub counterclockwise.

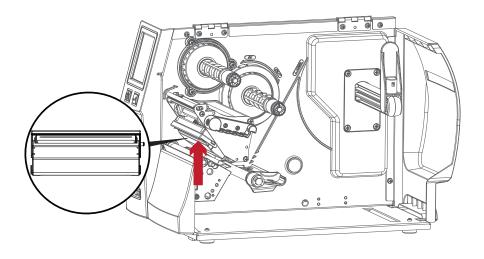

### 6.4 Cleaning the thermal print head

Dirt on the print head or ribbon may result in inadequate print quality (there are only partial images on the label). The printer cover should therefore be kept closed when possible.

Keeping dirt and dust away from the paper or labels ensures a good print quality and a longer lifespan of the print head. Here is how you clean the print head:

- 1. Switch off the printer.
- 2. Open the printer cover.
- 3. Remove the ribbon.
- 4. Release the print head by turning the print head release lever.
- 5. To remove any label residue or other dirt from the print head

(see Red arrow), please use a soft lint-free cloth dipped in alcohol to wipe.

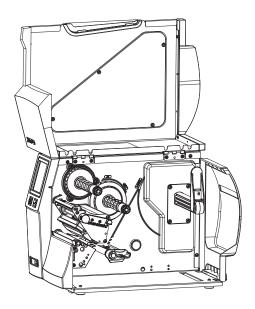

### Note

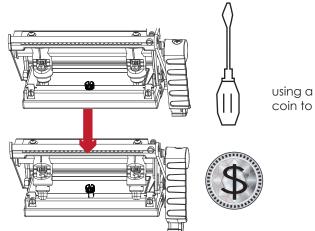

<sup>\*</sup> The print head should be cleaned once a week.

<sup>\*\*</sup>Please make sure that there are no metal fragments or other hard particles on the soft cloth used to clean the print head.

# 6.5 Adjusting the balance and print head tension

Open the printer cover.

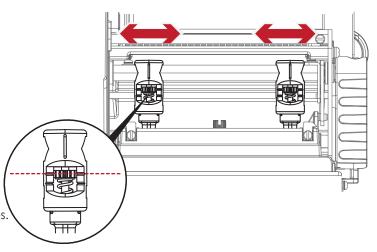

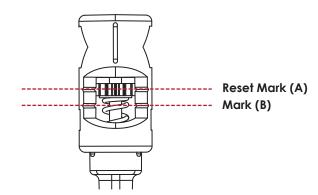

using a screwdriver or a coin to loosen the screw

When using a variety of label stock and ribbons, the ink may not be evenly distributed. If there is no printed image on one side of the paper , or the ribbon wrinkles, the print head pressure must be readjusted using the TPH spring boxes.

Move the TPH spring boxes as shown in the illustration to change the print head pressure. The wider the label you are using, the further apart the TPH spring boxes must be moved away from each other. If there is no quality improvement, you need to change the pressure on the TPH spring boxes.

Turning the screw left increases the pressure,

while turning it right reduces the pressure.

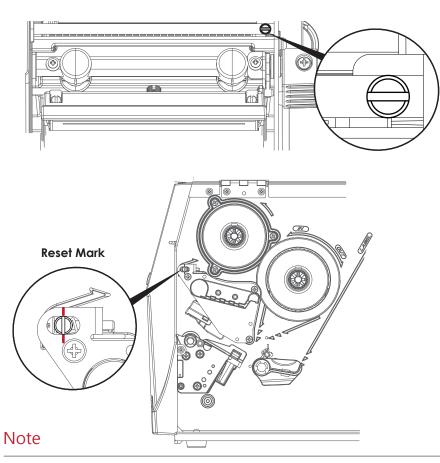

Be sure not to turn the screw so that it goes below Mark(B).

### 6.6 Ribbon shield settings

The use of different ribbon materials may cause wrinkling of the ribbon, which in turn affects the print result as illustrated by the examples in (a) and (b). To change the print quality, you can adjust the ribbon shield screws. If your print result looks like the example in (a), you need to turn ribbon shield screw counterclockwise. If your print result looks like the example in (b), you need to turn ribbon shield screw clockwise.

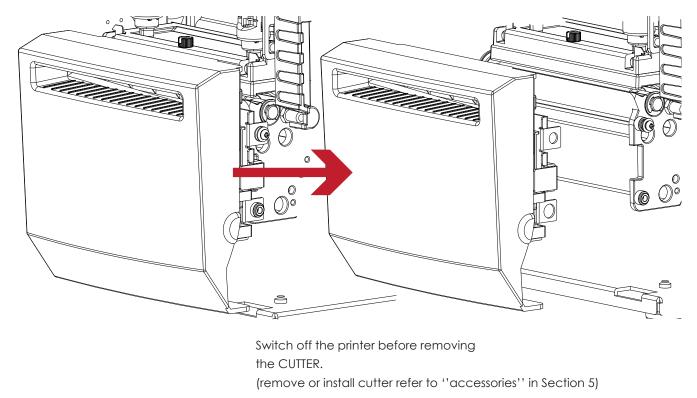

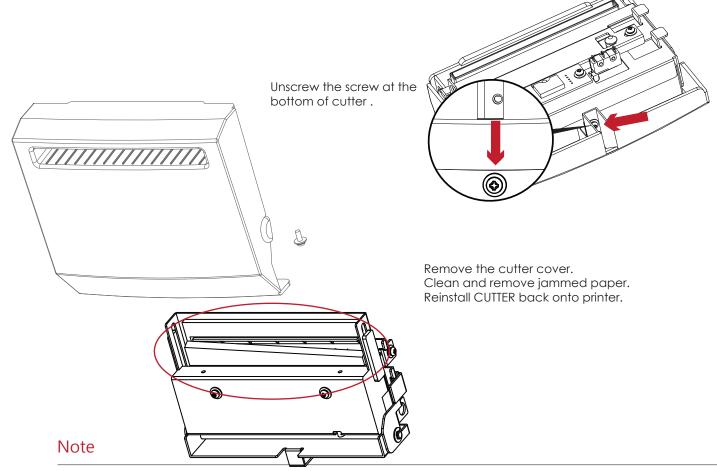

To keep track of the change in print quality, you should adjust the screws by half a turn at a time. Print a test page. If there is no improvement in the print result, turn the screw by another half turn. Do not turn the adjustment screw more than two full turns(360°).

\* If you adjust the screw by more than two full turns, the paper feed may no longer function correctly. In that case, unscrew the ribbon shield screws to align the reset mark and restart the adjustment process.

## 6.7 Cutter settings

\* Remember to switch off the printer before removing the CUTTER.

\*\*The label medium should be at least 30 mm long to ensure correct functioning of the cutter.

## 6.8 Troubleshooting

Problem	Solution
The printer is switched on but the LED does not light up.	Check the power supply.     Please see the Section 2.4
The LED lights up red and printing is interrupted.	<ul> <li>Check the software settings (driver settings) or command codes.</li> <li>Look for the error alert in the table in Section 3.3. Error Alerts.</li> <li>Check whether the print mechanism is closed correctly. Please see the Section 3.3</li> </ul>
The label stock passes through the printer but no image is printed.	<ul> <li>Please make sure that the label stock is loaded the right side up and that it is the suitable material.</li> <li>Choose the correct printer driver.</li> <li>Choose the correct label stock and a suitable printing mode.</li> </ul>
The label stock jams during printing.	<ul> <li>Clear the paper jam. Remove any label material left on the thermal print head and clean the print head using a soft lint-free cloth dipped in alcohol.</li> <li>Please see the Section 6.1</li> </ul>
There is no printed image on some parts of the label.	<ul> <li>Check whether there is any label material or ribbon stuck to the the print head.</li> <li>Check for errors in the application software.</li> <li>Check whether the starting position has been set correctly.</li> <li>Check the ribbon for wrinkles.</li> </ul>
There is no printed image on part of the label or the image is blurred.	<ul> <li>Check the thermal print head for dust or other dirt.</li> <li>Use the internal "~T" command to check whether the thermal print head will carry out a complete print job.</li> <li>Check the quality of the print medium.</li> </ul>
The printed image is positioned incorrectly.	<ul> <li>Check whether there is paper or dust covering the sensor.</li> <li>Check whether the label stock is suitable. Contact your supplier.</li> <li>Check the paper guide settings.</li> </ul>
Skipping labels during printing.	<ul> <li>Check the label height setting.</li> <li>Check whether there is dust covering the sensor.</li> <li>Run the auto-detection function.</li> <li>Please see the Section 3.2</li> </ul>
The printed image is blurred.	<ul> <li>Check the darkness setting.</li> <li>Check the thermal print head for dust or dirt. Please see the Section 6.1</li> </ul>
The cutter does not cut off the labels in a straight line.	• Check whether the label stock is positioned straight.
The cutter does not cut off the labels completely.	• Check whether the label is more than 0.2 mm thick.
When using the cutter, the labels are not fed through or cut off incorrectly.	<ul> <li>Check whether the cutter has been correctly installed.</li> <li>Check whether the paper guides are functioning correctly.</li> </ul>
The label dispenser is not functioning normally.	<ul> <li>Check whether there is dust on the label dispenser.</li> <li>Check whether the label stock is positioned correctly.</li> </ul>

### Note

\* If any problems occur that are not described above, please contact your dealer.

# **Enable LPT Port Function**

# 開啟 LPT 埠功能

Connecting the printer to the computer, follow the instructions below to enable the LPT function. 將電腦及標籤印製機連接上以後,請依下列指示開啟 LPT 埠功能

### Step 1.

Download GoTool and open Goconfig (Please go to the Godex official website to download.)

下載GoTool並開啟Goconfig(請至科誠官網下載)

	Printer Model	J		LCD Language	English •
	Resolution		_	Keyboard Setup	US •
7	Darkness	9	•	Buzzer	0N •
7	Speed	3	•	Smart Backfeed	OFF •
7	Stripper	0 (None)	•	Top of Form	2 •
7	Label per Cut	0	٢	PL Simulation	Auto •
7	Printing Mode	Direct Thermal	•	E RTC Date / Time (S	et Only)

# 剥纸器&背纸回收模组安装说明 Label Dispenser & Liner Rewind Module Installation

Remove the front cover 4. 取下头塞 Remove the plug

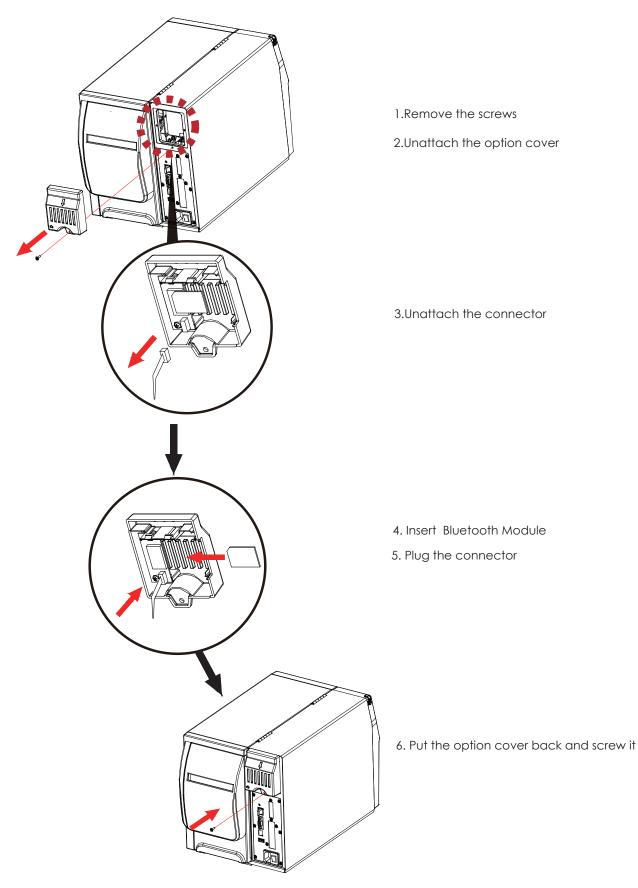

- 割纸接头插入连接座 Plug label dispenser connector into the connection port
   安装剥纸盖及螺丝
- Install label dispenser cover and screw
- 安装滚轴组合 Install roller combination
   安装背纸回收滚轴组合
- Install backing paper recycling roller combination
- 12. 安装Label Full组合 Install Label Full sensor
- 13. Label Full接头插入连接座 Plug sensor connector into connection port

- 14. 取下马达组合
- Remove the motor combination 15. 安装22t齿轮及扣环
- Install 22t gear and retaining ring 16. 回装马达组合并拉上皮带 Install motor combination and pull the belt
- 17. 安装齿轮组合(齿轮柱上矽油)
- Install gear combination(Gear column add silicone oil) 18. 安装齿轮组合(齿轮柱及齿轮上矽油) Install gear combination(Gear column and gear add silicone oil)
- 19. 安装离合器组合
  - Install clutch combination

- 20. 回装左侧上盖 Install left side cover
- 开启右侧上盖 Open the right side cover
   回锁最左边与最右边的螺丝 Reattach leftmost and rightmost screws
  - P/N : 313-043800-101 Ver. B

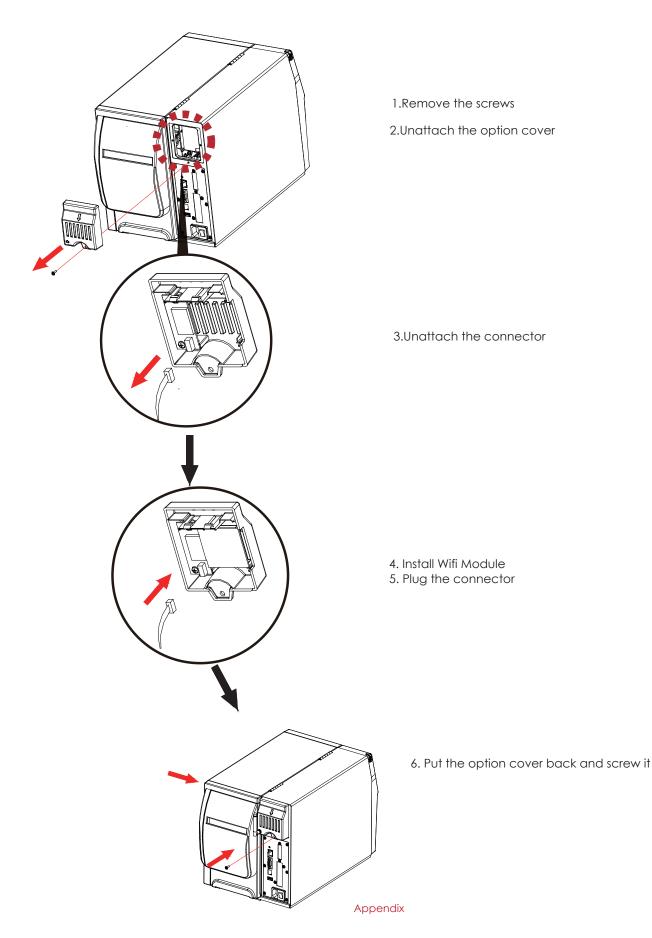

Bluetooth Module Installation

Wifi Module Installation

# Steps for setting Wi-Fi module

- Step 1. Power off the printer.
- Step 2. Install the Wi-Fi module.

Note : Methods for installing Wi-Fi module, please refer to Wi-Fi module installation.

Step 3. Power on the printer and wait 15 seconds. The main manu will display gray Wi-Fi icon and it means that the Wi-Fi module is already detected by the printer, as the figure below indicates.

#### Note

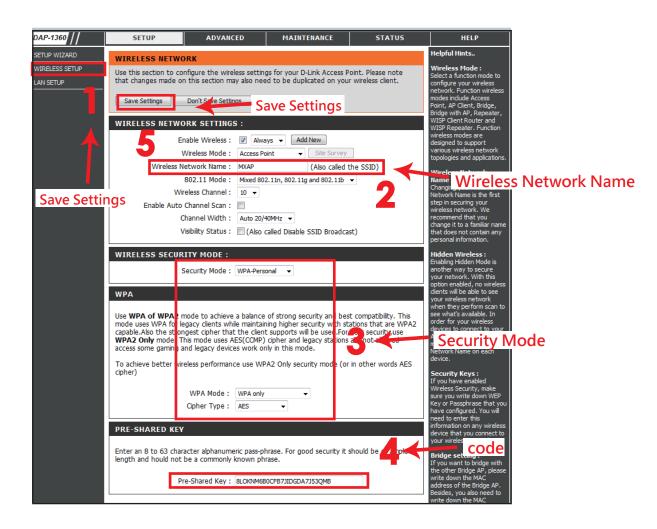

\* The firmware version of the printer should be above V.2005, otherwise you can not use Wi-Fi function.

- \*\* GoLabel version should be above V1.12, otherwise you can not use Wi-Fi Tool function.
- \*\*\* When a Wi-Fi module is installed into a printer, the Ethernet of the printer will lose its function.

# Steps for setting Access Point (D-Link)

- Step 1. Execute browser and log in the setting page of access point.
- Step 2. Click "WIRELESS SETUP" on the left side of the setting page(red circle 1) and enter into AP setting page. For the contents of setting, please refer to the figure below.
- Step 3. Click "Save Settings" button after the Wi-Fi AP is completely set. After approx.20 Seconds, the the setting of AP is stored and takes effect.

ZX1200i/ZX1300i/ZX1600i USER MANUAL Appendix Wi-Fi setting

# Methods for setting Wi-Fi module

# How to execute Wi-Fi Tool

Step 1. Execute GoLabel Version V1.12

Step 2. Select desired ZX1000i printer model, as the figure below indicates.

Step 3. Click "Save", as the figure below indicates.

rinter Setup X						
Printer Setup Printer Interface M	Miscellaneous					
Printer Setup						
Printer Model:	ZX1600i					
Resolution:	600					
Darkness	10					
Speed	3					
Stripper/Applicator	0 (None)					
Labels per Cut	0					
Printing Mode:	Thermal Transfer					
Tear-off Position (mm)	12					
Page Direction :	0 Degrees 🔹					
Fix Number	Database					
Print	2 Save Exit					

Step 4. Execute Wi-Fi Tool, as the figure below indicates.

ZX1200i/ZX1300i/ZX1600i USER MANUAL Appendix Wi-Fi setting

# How to set the corresponding items between Wi-Fi Tool and AP

Step 1. Set Wi-Fi parameters, as the figure below indicates.

Step 2. Click "Set Data" button after the parameters are completely set.

Approx. 5 seconds later, the printer will automatically reboot.

		WiFi Tool V1.12		x	WIRELESS NETWORK SETTINGS :
Set Data	または 其他     メート     オート     オー     オー	WIFI Tool V1.12  Enable WIFA2-PSK Open System  Disable  Disable  Disable  AES 1234567890	Engleb Engleb HEX • HEX • HEX •		WIRLEESS WIE WOrk STUDIOS:           Endek Wirders Kolt: Alaxas Part           Under Wirders Kolt: (WA Person)           V PA           V MA           V Weits Chart I alax Alaxas Part           Wirders Konton: The mode to advers a balance of shoring society and beat compatibility. The conton appoints will be used For best society, value work alaxas and many aligners donker work with in the mode work in the mode aligner society and beat compatibility. The conton appoints will be used For best society, value work also and grant of the work work in the mode aligner society work

Step 3. Approx. 15 seconds, LCD panel will display gray Wi-Fi icon, I and it means that the Wi-Fi module is already detected by the printer.

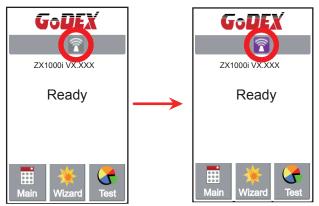

### Note

\* The Setting content of Wi-Fi Tool should be corresponding with the setting of AP.

# Check whether the Wi-Fi connection is successfully created

After 8~10 seconds, the Wi-Fi icon's will change from gray to purple

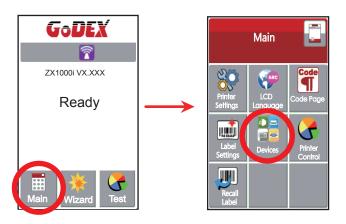

and it means that the Wi-Fi connection is successfully created, as the figures below indicate.

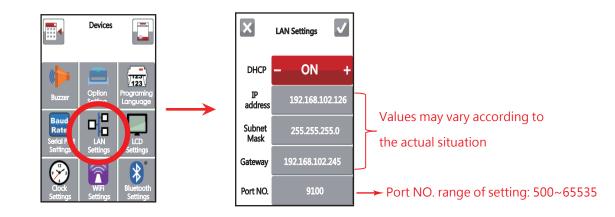

# Check the related information of LAN

Step 1. Select "Main" on the bottom left Corner of LCD panel.

Step 2. Select "Devices"

Step 3. Select "LAN Settings" and the display indicates the related information of LAN

ZX1200i/ZX1300i/ZX1600i USER MANUAL Appendix Wi-Fi setting

# How to create a connection between computer and printer via Wi-Fi

Step 1. Execute GoLabel Version V1.12

Step 2. Select "Printer Setup"

Step 3. Select "Printer Interface" and Click "LAN Port", and enter IP address, as the figure below indicates. Step 4. Click "Save"

Printer Setup X

### Note

\* With the rewind installed, set the stop position in GoLabel (E value) and Driver to 6.

\* Liner rewind can be operated without setting Golabel and Driver .

### Note

\* The rewind is applied to liner only, and do not use it with other printed labels.

\* If any adhesion is left on the label dispenser cover, Please clean it with soft fabric and denatured alcohol.
