# Quickstartguide for iDTRONIC LF RFID Readers

Installation LF-Version

Please refer to this installation guide to start both software and reader successfully.

1. Download the appropriate software from: http://idtronic-rfid.com/de/support/sdks/
2. Unpack the zip folder to a folder of your choice.
3. Open the folder **"Card Reader LF SDK_NOV14"**, and then open the folder **"General SDK"**, then open the folder **"Demo Software"**.
4. Connect the reader to USB-Port of your computer.
5. Check in the Windows Device Manager if the driver for the USB-Port is installed. If it is not installed, then click on this driverless port and select update driver-software, please use the driver from the folder **"USB-Drivers"**.

6. Start the file **"setup.exe"** and follow the installation procedure.
7. After successful installation, start the software at menu item **"Cont 125"** in programmes.
8. Select the appropriate Com-Port and click the **"Save"** button. If you don´t know the port you can also proceed with menu item **"Serial Research"**.

9. Now you can proceed to read and write tags.

If you want to use the KEMU function, then open the folder **"Keyboard Emulations for Windows"** and start the file **"setup.exe"**, after installation the KEMU function is ready.
